👤 PROFILE

Solutions-driven professional with hands-on experience developing consumer-focused solutions by using modern technical. Proven track record of bringing wireframes of the UX designer to life as well as creating a stellar finished product by collaborating with Back-End developers. Proficient in improving the end-user experience by liaising with key stakeholders, identifying bottlenecks, and building improvements. Instrumental in optimizing applications for maximum speed by maintaining code on a routine basis and debugging issues. Adept at eliminating procedural inconsistencies and redundancies by authoring functional requirement documents and guides.

💼 EMPLOYMENT HISTORY

Senior Web Developer at Remotely.works, Self Employed (Freelance)
December 2019 — Present

https://www.remotely.works/

- Plan, initiate, and execute a variety of projects in close collaboration with clients while serving as the senior full-stack web developer.

- Identify user/system requirements for new websites and applications. Prioritize software development projects, set timelines.

* Established a long-term relationship with clients by delivering projects on time while attaining high satisfaction levels.

Sr. Full Stack Engineer at Avery, Brea, CA (Remote)
March 2020 — May 2022

https://www.avery.com/

- Built new components and refactoring code for the new user interface using HTML5, CSS3, Angular, and Typescript.

- Developed Server Side REST services for front-end UI using Spring MVC.

- Led to a 30% increase in team productivity by quickly and efficiently resolving user-reported bugs in an Agile Safe team environment.

- Delivered product feature enhancements based on client requests.

- Communicated effectively with customers to explain feature functionality and generated quotes for development tasks.

Software Engineer at Medstar Health, Columbia, MD (Full-time)
June 2015 — January 2020

https://www.medstarhealth.org/

- Designed the User Interface by coding in HTML5, CSS3, React, Typescript, Tailwind CSS, and Bootstrap to build SPA (Single Page Application).

- Created some dynamically changing websites using JavaScript/Typescript and Node.

- Implemented Restful APIs and services using best practices to interact within the microservices and with the front end. Using Java spring MVC and spring rest.

- Converted existing AWS infrastructure to server less architecture (AWS Lambda, Kinesis) deployed via Apache Lib Cloud, Terraform and AWS Cloud formation.

* Commended for exhibiting exceptional performance and earned promotion from junior developer to senior front-end developer.

EDUCATION
